UA Academy

The UA Academy online learning center delivers premiere training on-demand. Enjoy instant access to engaging courses on UA products with the added ability to choose specific topics of interest. Interactive practices are mixed with short, instructional videos and offer you the flexibility you need, while saving you time and money. Log-in today at academy.uasc.com to access the latest courseware designed by UA aviation professionals specifically for pilots, technicians, and UA Authorized Dealers / Integrators.

Software and Devices

UA offers innovative training software and devices that promote portable, interactive learning. Our high-fidelity solutions are cost-effective and support learning operational concepts at any pace, in any place.

- Flight Management System Trainer with Touch CDU iPad Application
- UniLink™ Communications Management Unit (CMU) Trainer

Instructor-Led Training Courses

UA Instructor-Led Training (ILT) for pilots, technicians, and Authorized Dealers / Integrators delivers in-depth product familiarization in a formal classroom setting at our facility in Tucson, Arizona USA or on-site. Courses are led by our qualified and experienced UA instructors.

SBAS-FMS Operational

This 2-day course is designed for new operators of the Satellite-Based Augmentation System (SBAS)-Flight Management System (FMS) and existing operators seeking a better understanding of operating their SBAS-FMS. This course augments the UA Academy course with practical exercises and hands-on experience using real-world scenarios with the FMS Trainer and covers enroute and terminal operations, and approach operations.

TAWS Operational

This 1-day course is designed for new operators and existing operators seeking a better understanding of operating the UA Terrain Awareness Warning System (TAWS).

[Learn More](#)

InSight™ Operational

This 1-Day course is designed for new operators and existing operators seeking a better understanding of the InSight Display System. This course augments the UA Academy course with practical exercises and hands-on experience using the InSight Trainer Desktop Software Program for an interactive and engaging learning experience.

EFI-890R/H Advanced Flight Display Operational

This 1-day course is designed for new operators and existing operators seeking a better understanding of the EFI-890R/H Advanced Flight Display. Product familiarization is supported in the classroom and hands-on practice is offered when the customer's aircraft is available. Due to aircraft availability and configuration, length of this course may vary.

Integration and Installation

UA Integration and Installation courses are designed for Authorized Dealers and Integrators. These engaging courses include a technology overview, models and specifications, system interfaces, configuration, testing, troubleshooting, scheduled maintenance, installation certification, return to service, operational overview and training. The courses may also include interactive use of equipment and training software.

Courses are available for the following products:

- SBAS-FMS
- UniLink CMU
- InSight Display System
- Radio Control Unit (RCU)
- EFI-890R/H Advanced Flight Display
- Cockpit Voice and Flight Data Recorders (CVR/FDR)
- MFD-640 Multi-Function Display

End User Maintenance

UA End User Maintenance courses are designed for aircraft maintenance personnel seeking to advance their knowledge of UA products. These engaging courses cover system maintenance, troubleshooting and return to service procedures and may include interactive use of equipment and training software.

On-Site Training

When scheduling permits, arrangements may be made for on-site training of any course available (subject to fees plus additional expenses).

Scheduling and Cancellation

For ILT, call or email the Tucson Training Center for more information or to register. A registration form must be completed and returned prior to training to reserve a seat. Please make your reservation early to ensure seating availability.

In the event a cancellation is required, please contact the Tucson Training Center during normal business hours, at least 48 hours prior to the scheduled course. Cancellations made more than 48 hours in advance of the first day of training will not be charged. Cancellations made within 48 hours will be charged for the scheduled training.

All courses are provided in English.

Universal Avionics reserves the right to make changes to the schedule or course material, and to deny training and/or materials to competitors, their representatives, and to citizens of a country subject to U.S. Trade Embargo.

Training provided by Universal Avionics Training Department is not intended to meet the requirements of an FAA Part 142 school nor is it sanctioned by a Civil Aviation Authority or Agency, but is meant only to provide product familiarization.
